Formula provided by: Precious Cosmetics, Lodi, New Jersey, USA

## Procedure

1. In suitable sized kettle equipped with propeller, weigh phase A1. Add remainder of phase A ingredients, mixing well, and heat to 75°C.
2. Premix phase B ingredients and heat to 75°C.
3. At 75°C, add phase B to phase A, mixing well.
4. Start cooling to 30°C.
5. Add phase C ingredients, mixing well.
