

Broad Spectrum, Water Resistant, SPF 25+ Daily Facial Moisturizer

Description: This elegant, light feeling water-in-oil (W/O) formulation spreads well, covers evenly, and has built-in water resistance, enhanced by the use of two emollients with excellent barrier characteristics. Combining organic and inorganic sunscreen actives, along with placement of the actives in both the aqueous and emollient phases, allows for a high SPF with a relatively low level of active. The formula achieves protection beyond broad spectrum with a critical wave length of 377.8nm. The success of the formulation is attributed to Zemea® propanediol keeping the water-soluble actives in solution through the evaporation process when the product is applied to the skin.
